Digital Commons @ Michigan Tech Project Procedures

The Van Pelt and Opie Library invites proposals from Michigan Tech faculty, researchers, staff and students for new projects to be included in Digital Commons @ Michigan Tech. This digital repository offers worldwide access to research, scholarship, campus publications, and other creative works by members of the Michigan Tech community.

Please submit project proposals to digitalcommons@mtu.edu. A guideline for project proposals can be found here.

Proposals will be reviewed for consistency with the Digital Commons @ Michigan Tech content policy and availability of appropriate resources. After this review, the proposal will be submitted to library administration for approval.

Following approval, project leader(s) will be asked to complete a project plan. A template for project plans can be found here.

Inquiries regarding this process can be sent to digitalcommons@mtu.edu.
