Copyright Permission: Luke Bowman

Figure 2.2 These images were taken by a research colleague, Jose Fredy Cruz Centeno. He gave me full permission to use his images for this project (see below).

Figure 2.3 The modifications were substantial to enough to exempt this image.

Figure 2.4 This is an unpublished map created collaboratively with CEPRODE (a local NGO), which we then posted on Facebook for use among local practitioners. I received written permission from the CEPRODE project leader, Rutilio Antonio Parada Galan, to include this map in the dissertation (see below).

Figure 3.1 This map is correctly cited, and is public domain, as it was created by USGS personnel—employees of the federal government.

Figure 3.4 This image was produced by the Government of El Salvador’s Ministry of Housing and Urban Development for public use and reproduction, therefore it is exempt.

Figure 4.1 This image was created by SERVIR, a working group from both USAID and NASA—both federal government institutions, so this image is exempt.

Figure 4.2 These images were taken by a research colleague, Jose Fredy Cruz Centeno. He gave me full permission to use his images for this project (see below).

Chapters 2 and 3 have been submitted to the Geological Society of America and the Journal of Applied Volcanology. Both journals permit authors to use articles in dissertations without formal permission (see below).

Chapter 2:

Copyright Information

GSA OWNS COPYRIGHT ON ALL ITS PUBLICATIONS
- Fair Use Permission
- Permission Granting and Payment
- License Fee
- Additional Information for Authors

GSA obtains copyright ownership from authors of all articles and books. Works prepared by U.S. government employees in the course of their work are in the public domain, however, and are not copyrighted. It is the responsibility of those requesting permission(s) to determine if an article meets this test and is in the public domain.

Special "Fair Use" permission

If you want to use a single figure, a brief paragraph, or a single table from a GSA publication, GSA considers this to be fair usage, and you need no formal permission and no fees are assessed unless you or your publisher require a formal permission letter. In that case, you should print a copy of this document and present it to your publisher.

An author has the right to use his or her article or a portion of the article in a thesis or dissertation without requesting permission from GSA, provided the bibliographic citation and the GSA copyright credit line are given on the appropriate pages.
Chapter 3

SpringerOpen Access license agreement

Brief summary of the agreement

Anyone is free to:

- **Share**—copy and redistribute the material in any medium or format
- **Adapt**—remix, transform, and build upon the material

for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

**Attribution**—You must give [appropriate credit](#), provide a link to the license, and [indicate if changes were made](#). You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.

**No additional restrictions**—You may not apply legal terms or [technological measures](#) that legally restrict others from doing anything the license permits.

**Statutory fair use and other rights are in no way affected by the above.**

[PDF of this license](#). The license can be requested from Springer by the authors at any time.

Image Permissions:
Cordial salutations, Luke Bowman. I hope you are well. Through these means I authorize you to use the photographs that I provided to you and include them in your doctoral dissertation as part of our collaborative work that was developed between Michigan Tech and the UES-FMP, during your time in El Salvador. Thanks for all of your support during your work in San Vicente.

Sincerely,

Jose Fredy Cruz

---

Saludos cordiales Luke Bowman, espero que estés bien, por este medio doy mi autorización para que puedas usar las fotografías que te proporcioné e incluirlas en tu tesis doctoral, esto como parte del trabajo conjunto que se desarrolló entre Michigan Tech y la UES-FMP, durante tu estancia en El Salvador. Gracias por todo tu apoyo durante tu trabajo en San Vicente.

Atentamente:

José Fredy Cruz.

Dear Luke Bowman, through these means we authorize you to use the maps and photographs that we elaborated in coordination with the Michigan Tech University (you), the University of El Salvador and CEPRODE.

From the part of our organization, CEPRODE, and from my own perspective we are satisfied that our publications will be taken into account in your studies at Michigan Technological University.

Cordial Salutations,

Ing. Rutilio Antonio Parada Galan
Project Coordinator and Vice-President of CEPRODE
