

- Figure 3.16 is a screenshot of the web user interface of open source software Franklin (<https://github.com/mtu-most/franklin>). The software Franklin is published under GNU Affero General Public License v3.0 (Submitted along with this documentation).

I consulted Nora Allred, copyright librarian at Michigan Tech, and she pointed out these statements from the license that provide me the right to use the screenshot:

- You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

Because the web interface that I screenshot does not display any legal notices, then I do not need to provide any legal notices in my thesis.

- The materials contained in Chapter 2 was previously published in Journal Materials (<http://www.mdpi.com/1996-1944/10/2/110>). The Journal has open access policy (<http://www.mdpi.com/about/openaccess>) which allows it to reuse the published materials given proper accreditation/citation is given
- The GUI in Figure 2.9 is created by me, so no documentation is needed
